ABEER AHMAD

Full-Stack Developer | Django & Flutter | ERP & POS Systems

Rawalpindi, Pakistan | +92 336 7804302 | abeermkawan@gmail.com | github.com/abeerahmad5694 | linkedin.com/in/abeer-ahmad-456296405

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience independently building ERP, POS, and mobile applications end-to-end — from backend architecture and REST API integration to production deployment on the Google Play Store and Apple App Store. Skilled across Django and Flutter, with practical experience in payment gateway integration, real-time data syncing, and ongoing client support for live business systems.

EXPERIENCE

Software Engineer | **Digital Ocean Technologies**

June 2025 – August 2026 | Rawalpindi, Pakistan

- Built and maintained multiple ERP and POS systems for retail and business clients, providing ongoing technical support to keep production systems running smoothly.
- Integrated REST APIs and debugged backend issues across client systems to maintain reliability and uptime.
- Set up accounting workflows inside ERP systems used for day-to-day business operations.

SKILLS

Languages: Python, PHP, JavaScript, SQL, HTML, CSS

Frameworks & Technologies: Django, Flutter

Platforms & Tools: Google Play Console, Firebase Console, App Store Connect, Payment Gateway Integration (Stripe), Database Design, ERP Systems, Accounting Logic, Git, GitHub, ESP32

PROJECTS

On-Demand Services App | **CodeIgniter, Flutter**

- Independently developed and customized an on-demand services platform for a client, working across the CodeIgniter backend and Flutter mobile app, with one collaborator supporting QA testing and design assets.
- Integrated Stripe to add recurring payment functionality for subscription-based transactions with the help of AI.
- Delivered the project end-to-end — development through deployment — within a 1–2 month timeline.
- Handled full deployment of the app to the Google Play Store and Apple App Store.

ERP Systems | **Django, MySQL**

- Independently built ERP systems for retail businesses across multiple industries, including marts, electronics stores, and automobile showrooms.
- Implemented REST APIs following MTV architecture to connect the frontend, backend, and database layers of each system.
- Provided ongoing client support to maintain and troubleshoot systems after deployment.

POS Systems | **Django, MySQL**

- Built real-time stock syncing to keep inventory accurate across POS systems for retail clients.
- Built reporting modules giving business owners better visibility into sales and inventory trends.

Food Delivery App | **Laravel, Flutter**

- Independently built a full-stack food delivery application from a template-based starting point, with one collaborator assisting on testing.
- Integrated maps and push notification APIs to support order tracking and real-time updates.
- Customized the system to match business requirements and resolved issues to maintain stability.

Face Recognition Attendance System | **Assistant Developer**

- Assisted in developing a face recognition-based attendance tracking system.
- Integrated IP camera input for automated image capture and processing.
- Developed an ESP32-based attendance device for server communication, name display, and voice-based identification feedback.

EDUCATION

BS Computer Science (Ongoing) | **PMAS Arid Agriculture University, Rawalpindi**

Started September 1, 2026 | Rawalpindi, Pakistan

Diploma in Information Technology | **National Institute of Computer Sciences (Technical Board Lahore)**

July 2025 – July 2026 | Rawalpindi, Pakistan | Grade: A+

FSC (Pre-Engineering) | **Steps College (Federal Board)**

Completed June 2025 | Rawalpindi, Pakistan | Grade: A
